Book Recommend: The Hiding Place

A classic - A must read!!

What an inspiring true story of a woman-Corrie, her sister-Betsy and their Father. It's a book that shakes us to the core of who we really are and what God-given capabilities are in all of us if pressed into a hard place. The Ten Boom family had an incredible love for people and the God they served. This love was evident in the way they lived their lives, not thinking of themselves but putting others first at any cost. A true testimony of the love of Jesus Christ within the heart of believers. Now-a-days websites are such an integral part of life. Its like everyone owns a toothbrush, right? Its just part of our everyday activities to brush our teeth. Websites are a part of our everyday lives as well; we shop online, read, research or blog and many, many other things. You may find yourself asking the question; What did we do before the Internet? How did we function?

**Do you have ???
about websites or the
Internet?

Believe it or not there is a remnant in our modern-day society that still thinks 'websites are for geeks!' This group is not necessarily made up of seniors but includes a wide range of age groups. The funny thing is over the past year or so I have spoken with many people mostly Christians and it seems the majority of this thinking comes from church folk!
